NTU Plus Academy Research Programs

The Office of International Affairs (OIA) offers Research Programs in Spring (February-March), and Summer (June-August). These programs provide opportunities for students to gain experiences and insights with leading faculty's research or state-of-the-art laboratories at NTU. We cordially invite you to welcome our international students to work with you on current research or a new project and improve research skills and knowledge in a specific area of interest.

For more information about the current research programs, please refer to the [Plus Academy website](#).
